1 Introduction

It is possible to apply a specific price list for products to a particular customer or group of customers. This can be useful for businesses with sites in multiple countries with multiple currencies, for set term pricing structures (eg. Christmas) and for business to business sites where different customer groups will be offered different pricing structures.

Out of Scope

This functional specification is for the Commerce platform only. Integrations with 3rd party systems such as warehouses are out of scope and will be documented separately as part of the implementation specification phase.

2 Commerce Admin

F-PRI01.0	Creating Price Lists
F-PRI01.1	The system will allow authorised users to add and edit a price list
F-PRI01.2	The system will allow an authorised user to assign the following values to a price list ● Slug (Mandatory) ● Name ● Currency Code
